

Positive Actions Training Methodology

We believe that it is what attendees do that increases and sustains learning. This interactive-oriented approach to learning ensures that the process is fun and easy to implement.

We employ:

1. Team interaction as primary learning tools
2. Team discussions
3. Team and individual exercises
4. Role-playing
5. Customized MS PowerPoint presentation slide handouts
6. Case studies to demonstrate success of workshop techniques
7. Workshop action plans
8. Free tele-class follow-up within two weeks of the workshop

Apart from the program content, this methodology ensures that the participants learn from each other and also automatically learn:

1. Teamwork
2. Presentation skills
3. Time management
4. Brainstorming
5. Creativity
6. Accountability
